## Localizar citação no CWYW

The fossil in question was generally regarded to be the 220 million year-old remains of *Tyrannosaurus Rex* (Billoski 1993). Several years ago, however this hypothesis was overturned by Morehouse and Tung with the discovery of yet another species (Morehouse and Tung 1993) which is now the undisputed progeny (Turnhouse 1987; Argus and Matthews 1991) of the species at hand. While the true origin of this larger reptile is quite uncertain at this time, it is thought to be from central or eastern Asia.

Where the other species (Schwartz and Billoski 1990) arose is a mystery. If it was central Asia, we could reasonably infer that other reptiles were not dominant in this ecosystem. Some think that we will never know (Schwartz 1976; Billoski 1987; Whiting, Billoski et al. 1987). However, fossils currently in the museum in Berlin provide strong evidence that the emerging reptile was small-boned and duck-billed (Whiting, Billoski et al. 1987), possibly with a larger wing-like arm.

**Note que:**

- Quando inserir referências em **notas de rodapé** deverá realizar um passo adicional.
- O ***Endnote Web*** controla a formatação das citações e das bibliografias, mas o ***Word*** controla a numeração e a disposição da nota de rodapé.
- Isto significa que, caso deseje inserir uma referência numa nota de rodapé, deverá introduzir a nota de rodapé em primeiro lugar e, só depois, inserir a referência.
- A referência será inserida na nota de rodapé e também na bibliografia que se encontra no final do documento.

# Editar citações com o CWYW

O ***Endnote Web*** (***ENW***) actualiza todas as citações e a bibliografia sempre que é inserida uma nova citação ou se formata a bibliografia.

O que vemos como citação é, na verdade, o resultado de um código de campo do ***Word***, criado pelo ***ENW***.

Estes códigos do ***Word*** são usados para obter informações que devem ser actualizadas automaticamente, à semelhança de uma fórmula numa folha de cálculo do ***Excel***, onde se vêm os resultados da fórmula, mas não a fórmula propriamente dita.

# Editar citações com o CWYW

Do mesmo modo, aqui não se vêem os códigos mas apenas as citações.

O resultado é que sempre que realizar alterações manuais na citação, o código que determina os resultados finais não será alterado, pelo que, quando o documento for reformatado, essas alterações desaparecerão.
